Sapeando you further this list of keyboard shortcuts for Chrome on Mac will make you perform the tasks of your browser much easier. Many work in the shape for Windows and Linux, with some minor variations. So if you use Chrome on different computers, check out chrome's list of keyboard shortcuts for those platforms as well. And for more ways to navigate your or in your apps, see our Keyboard Shortcuts section. When used, keyboard shortcuts can save users a lot of time. Google Chrome makes it easy to use the keyboard shortcut, providing a multitude of options for navigating your browser. For some of these shortcuts, the differences between PC and Linux users and Mac users is just the difference between the Ctrl key and the Command key. But other shortcuts are more specific to each type of computer system, so it's important to note which system you're operating on if you want a seamless experience using keyboard shortcuts. If you're using Mac Catalina (or something newer), keyboard navigation is enabled by default in system preferences, but for other operating systems, you may need to enable it. If you're ready to start using keyboard shortcuts, here are chrome shortcuts available to Windows, Linux, and Mac users. Check out the products mentioned in this article: Apple Macbook Pro (From \$1,299.00 on Apple) Acer Chromebook 15 (From \$179.99 at Walmart) 26 essential chrome tab and window shortcuts for Mac, Linux computers and Windows
